⑤ Roadmap

# 01 OVERVIEW

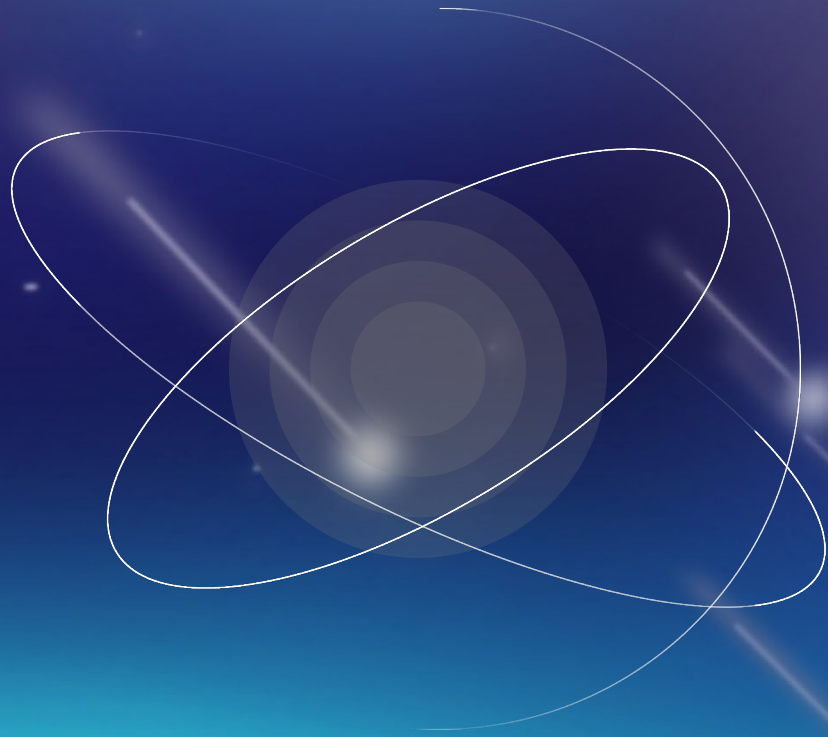

Shooting Star from Germany. The purpose of Shooting Star is to create a secured utility BSC-Token [Stars]. Shooting Star's unique infrastructure allows its believers to invest in a long term project safely. The core team is small but very experienced and transparent. The hard work from the team, paired with the beliefs from its community that Shooting Star will reach its 1 billion capital milestone shortly, created a strong trust bond between the team and the community. Ways for [STARS] to rocket to the moon are: Shooting Star creates its own launch pad with its own unique contracts for new projects, unique NFTs, listing on multiple major worldwide Exchanges and cooperating with well-known companies. [STARS] will be the biggest and brightest Binance-Smart-Chain Token. When we reach the 3rd quarter on our roadmap, we will takeover Ethereum and Cronos Network!

When the shooting star shower comes, look up at them, make a wish and believe firmly that the [STARS] will be the biggest and brightest Binance-Smart-Chain Token.

# 02 What is Shooting Star?

Shooting Star Token [STARS] is based on BSC and it is dedicated to create a secure ecosystem for the investors and community. The developed DeFi Smart-Chain-Protocol will be verified and audited by a strict and well-reputed audit provider. Liquidity will be locked for 12 months and extended thereafter. There is a transaction fee of 8% per transaction. 2% will be given to true believers in the form of [STARS] token rewards. 2% goes directly to the liquidity pool. 4% will go to marketing-actions and [STARS] burn.

## Side-Story:

I was constantly looking into the eyes that looked at me from the people at the Earth and could hear the countless prayers in their heart. I hear them praying: The BSC space is too uncertain, insecure, and full of deceit, please give us more security and peace of mind. Please give us more direction and hope to light up our future. Our shooting star, the dream star.

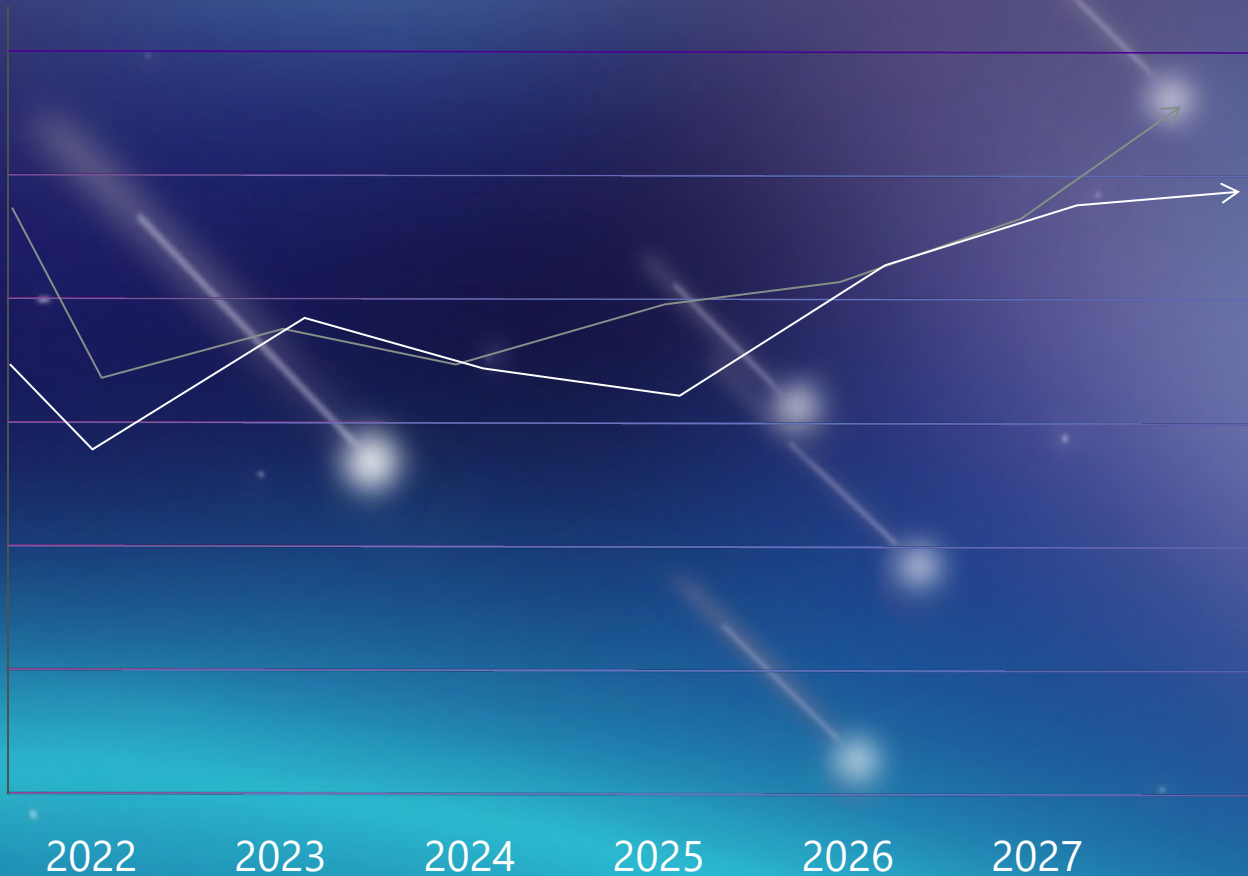

So, just tonight, I appeared with a mission and a task, dragging behind me are the dreams and expectations of countless people. I will build a bridge, and at the other end of the bridge is my hometown, where you can sleep well, every night, without worry, without fear. I am the star you shall be living in, you shall be laughing in. And so it will be as if all the stars were laughing when you look at the sky at night, you -only you- will have a star that can laugh. And that star will be me.

# 03 Token Information

## Shooting Star Value

- Name: Shooting Star
  - Symbol: STARS
  - Token Type: BEP20
  - Total Supply: 1,000,000,000,000,000,000
- 

2% Reward in [STARS]

2% goes directly into liquidity

4% Marketing/Burn-Wallet

# 04 Security

Maximum sales:

Any transaction that sells more than 1% of the total supply will be rejected. This prevents large-scale one-off that drastically change the price of our Tokens. In order to protect the rights and interests of all holders and the healthy circulation of tokens, this is our unique protection mechanism.

Additional security fee:

Swing trading is a common strategy that can affect price behavior. In order to incentivize holdings and reduce dumping dynamics, we added 2% tax into the liquidity pool per transaction.

Shooting Star [STARS] comes with a high-secured contract, locked liquidity, verified and audited on BSC.

!!!We implement an anti-bot into the contract, to launch safely to the moon!!!

# 05 Roadmap

### Q1/2022

- Presale Releases
- YouTube Campaign
- Aggressive Marketing
- Submission on Voting Sites
- AMA on Telegram Groups
- CoinGecko Application
- CMC Application

### Q2/2022

- Massive Marketing
- Burn
